

Disposable Medical Infusion Apparatus Dialysis Bag Making Machine

Features:

The equipment is film die cutting punching, automatic stamping forming, automatic paste, photoelectric tracking, automatic sealing and cutting, electronic counter, and other functions into one step machine, it is the production of infusion apparatus, dialysis paper, syringes bag ideal equipment.

Equipment:

The main motor adopts frequency control of motor speed transducer (DeFu)

The machine adopts stepper control system of step motor (Jiangsu)

All the parameters through the real-time display of computer monitor

Screen of a computer (Ruian, three computer control)

Electrical chengtai brand

Harbin bearing production

The bad bore hole shape monolayer can be round or triangular

Static eliminator 16kw

Main Specifications:

Effective width 300mm
Width of the bag 120mm
The length of the bag 300mm
Bag making speed 10-110pcs/min
Coil diameter Max.600mm
Bag making line number 1-9
Temperature range 0-300
The total power 3kw
Heavy machine 1000kg
Size L3500*W1000*H1000mm
