

## PVC Film Cutting Machine

PVC film cutting machine is ideal for cutting for pvc wire protection film, pvc cling wrap, pe stretch wrap roll etc.

By PLC automatic programmer to coordinate with touch screen, it works fully automatic, it cuts the film, and the inner paper core together.

The minimum width starts from 20mm to any width you want.

This machine can work as stretch film slitter revider, it is more user friendly without putting the pre-cut paper core on the rewinding shaft.

As multi-functional, this machine can use as paper core cutter, this is value added for film converter as some of the defect paper core (520mm width) can be cut into smaller width for other use purpose.

### **Main parameters:**

Name: PVC film cutting machine

Model: PPD-PVCC1500

Raw material width: 1500mm

Raw material inner core diameter: 76mm

Raw material diameter: 106mm
