

Thermal Paper Slitting Machine

Model:PPD-Y500C

Thermal paper slitting machine is suitable for the slitting of various paper rolls, such as thermal paper, fax paper, cash register paper, ATM paper, electrocardiogram, medical recording paper, carbonless copy paper, computer paper and other paper rolls.

Machine adopts Siemens microcomputer control and touch screen control. All the data is set on the touch screen, machine will work automatically.

The surface is connected by the winding method, the warning line is automatically printed, the length is intelligently set, the unwinding tension is manually adjustable, and the main body rotation adopts the frequency conversion control speed, which can perform two-stage shifting.

Features:

1. Machine is with a red line plus marking device for printing a red line at the end of the paper roll.
2. The machine is cut with a circular knife and equipped with automatic waste discharge device.
3. The machine has automatic paper insertion and a good adjustment of the tightness of the winding material.
4. Unwinding is equipped with a fully automatic tension controller to maintain constant tension.
5. With automatic meter counting function, the machine will stop automatically when the set value is reached.
6. Equipped with emergency switch.

Main data:

Model:PPD-Y500C

Mother roll width:500mm

Mother roll max diameter:1200mm

Mother roll inner core diameter:76mm

Slit roll width:20mm minimum

Slit roll inner core diameter:12.7/15/18mm etc

Slit roll outer diameter:max 180mm or customized

Speed:max 150m/min

Power:4kw

Voltage:220/380/415/450v option

NOTE:Different sizes can be customized.
